Cotton: World Markets and Trade

Pakistan Cotton Imports Forecast a Record High in 2003/04

This month, USDA increased Pakistan's cotton import forecast for MY 2003/04 by 350,000 bales to 1.9 million bales, which would make Pakistan the third largest cotton importer in the world. The 1.9 million bales would be an all time record for Pakistan cotton imports, and nearly double last year's total.

The United States is a major cotton exporter to Pakistan. From January to November 2003, the United States exported more than 500,000 bales of cotton to this country, making it the seventh largest market for U.S. cotton.

In recent years, Pakistan mill use has shown strong growth mainly due to export-oriented textile industries. Pakistan's textile and apparel industries have shown a strong performance in the world market, and its cotton yarn exports reached a record in December. According to Pakistan's Federal Bureau of Statistics cotton fabric exports in 2003 exceeded 2 billion square meters (2.24 billion square yards), showing a 0.2 percent growth over a year ago. Both knitwear and bed wear exports, with growth rates of 32.3 percent and 23.9 percent, respectively, reached new records in 2003.

Pakistan's production has not kept pace with consumption, fueling the need for more cotton imports. Spinners are mostly interested in high-grade longer staple cottons. Reports indicate that high-grade lots are traded as high as 71.11 cents per pound for F.O.B. gin yard.

U.S. COTTON OUTLOOK

The U.S. estimates for 2002/03 and preceding years were unchanged. Projections for 2003/04 are also unchanged. With 13.2 million bales (unchanged) projected exports, U.S. is expected to enjoy record cotton exports this marketing year.

WORLD COTTON OUTLOOK

The world estimates for MY 2002/03 were revised to reflect higher production and use, but lower trade and ending stocks. The use was up 147,000 bales mainly due to an increase for Pakistan.

The 2003/04 world forecasts as compared to last month show higher production, use, and ending stocks, but lower beginning stocks and trade. The production was up 455,000 bales mainly due to an increase for China. The total use grew by 129,000 bales mainly due to increases in mill use for China (300,000 bales) and Pakistan (200,000 bales), which was offset by lower use for Europe and Russia.

Since the January report, the major changes for the world 2003/04 forecasts are as follows:

China: Forecasts for China's production and use were adjusted to reflect both higher production (400,000 bales), use (300,000 bales), and exports (100,000 bales) due to the availability of new official data.

Pakistan: The 2002/03 estimates, as well as the 2003/04 forecast for Pakistan's use were adjusted to reflect additional use of 200,000 bales. For 2002/03, the additional use was expected to reduce ending stocks. For 2003/04, however, additional imports are expected to accommodate higher consumption.

Australia: Australia's 2003/04 exports increased by 100,000 bales in February due to a 100,000 bales increase in the production forecast.

Brazil: The 2003/04 forecast for Brazilian cotton imports was increased by 100,000 bales based on trade data. Brazil is expected to increase its ending stocks by the same magnitude.

Russia: The 2003/04 forecast for Russia's cotton use was lowered by 100,000 bales based on trade data, indicating lower imports.

Italy: The 2003/04 forecast for Italy's use and imports were lowered by 100,000 bales.

Greece: The 2003/04 forecast for production in Greece was lowered by 100,000 bales. Greece is expected to reduce its exports by the same magnitude.

Hong Kong: The 2003/04 forecast for Hong Kong's use was lowered by 60,000 bales based on the year-to-date trade data. Hong Kong is expected to lower its imports by 65,000 bales.

Germany: The 2003/04 forecast for Germany's imports was lowered by 50,000 bales due to a decline in year-to-date imports compared to last year. Lower consumption drove imports down by 50,000 bales.

Zimbabwe: The 2003/04 forecast for Zimbabwe's exports was lowered by 50,000 bales due to a 65,000 bales decline in production forecast.

COTTON PRICES

The A-Index, a principal measure of international cotton prices, is an average of the five lowest quotes of major cotton growths for delivery to Northern European ports. In January, the index averaged 76.16 cents per pound, up 2.80 cents from December's average. In New York, the nearby March future contract settlement price decreased 4.34 cents between the end of December and the end of January, closing at 70.73 cents per pound on January 30.

Cotton Consumption and Stocks

	November	October
Seasonally adjusted daily rate of consumption	25,377 bales	25,162 bales
Total bales consumed per month	527,231 bales	486,214 bales
Seasonally adjusted annualized consumption rate	6.62 million bales	6.57 million bales
Active spindles	2.23 million	2.27 million
% Spindles dedicated to 100% cotton	55 percent	56 percent
Cotton's share of total fibers consumed on spindle system	82.74 percent	81.67 percent
Cotton Stocks at mills	338,170 bales	352,295 bales
Cotton Stocks in public storage	14,885 bales	13,155 bales

U.S. Highlights

Textile Mill Report. Mill buyers purchased a light volume of 2003-crop cotton for March 2004 through July 2004 delivery. Buyers made additional inquiries for a light volume of cotton for delivery through September 2004. Some mill buyers took advantage of lower futures prices to fix a light volume of previously contracted cotton. Mill inquiries for 2004-crop cotton increased. Demand for ring-spun yarn was moderate to good. Demand for open-end yarn was light. Most mills operated on a five or six-day schedule.

U.S. COTTON EXPORTS totaled \$316.6 million or 948,267 bales in November according to Census data, up from \$143.9 million in October or 482,457 bales. China was the top destination for U.S. cotton in June at 370,000 bales or \$123 million, followed

by Mexico at 168,343 bales or \$25 million.

U.S. COTTON IMPORTS fell to \$327,000 (699 bales) in November from \$3.3 million (8,357 bales) in October. Australia accounted for 464 bales, and Egypt accounted for 229 bales in November, while Egypt accounted for all imports in October.

* Loss for countries outside the United States reflects cotton lost or destroyed while in the marketing channel. For the United States, loss reflects the difference between stocks as reported by the Bureau of the Census and implicit stocks based on supply plus total use. A negative "loss" is a positive number.

1. The A-Index is the average of the five lowest quotes of the following descriptions (all 1-3/32"): Memphis Terr.; Calif. Ariz; Mexico; Central America; Paraguayan; Turkish; Uzbeki; Pakistani 1503; Indian H-4; Chinese Type 329; West African; Tanzanian; Greek; Syrian; and Australian.

2. Reflects incorporation of forward shipment quotations but does not include the Secretary's discretionary adjustments.

Averages for August 1998 and forward reflect 1998/99 quotations; others are 1997/98 quotations
